- Preservatives-free

\*About caffeine, we assume less than 0.005 g (per 100 ml) 0 g.

Just what your  
body needs for...

Stress/  
Unhealthy diet/  
Fatigue

- Health or skin problems due to unstable female hormonal balance
- Age-related skin problems
- Unhealthy diet (lack of balance, excessive alcohol intake)
- Fatigue from housework and looking after children
- Excessive overtime at work
- Fatigue due to cold hands and feet

## Customer feedback

I no longer get tired so easily. GMT®-SHOT has made every day pleasant for me!

K.S. -In her 40s

I came across GMT®-SHOT when I couldn't figure out why I felt the way I did and was wondering whether my menopause had started. It's now two weeks since I started to drink it and I no longer get tired so easily. GMT®-SHOT has made my life so much better.

My body doesn't get cold anymore and I can sleep well every night

Y.H. -In her 40s

I used to be bothered by really cold hands and feet—even to the extent that I sometimes couldn't sleep—until I started to drink GMT®-SHOT. Now, the swelling in my feet also seems to have improved.

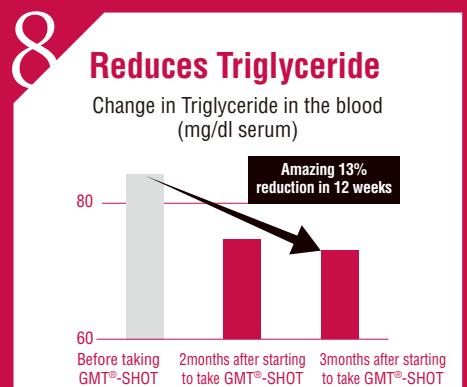

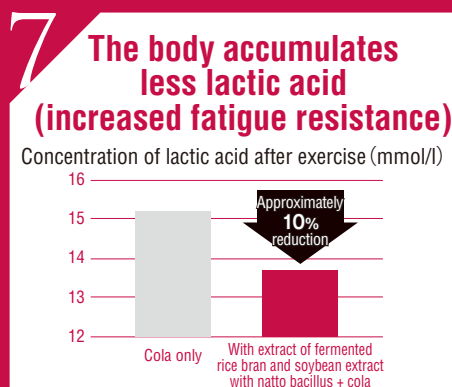

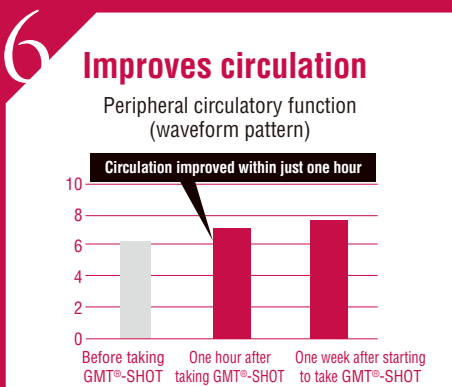

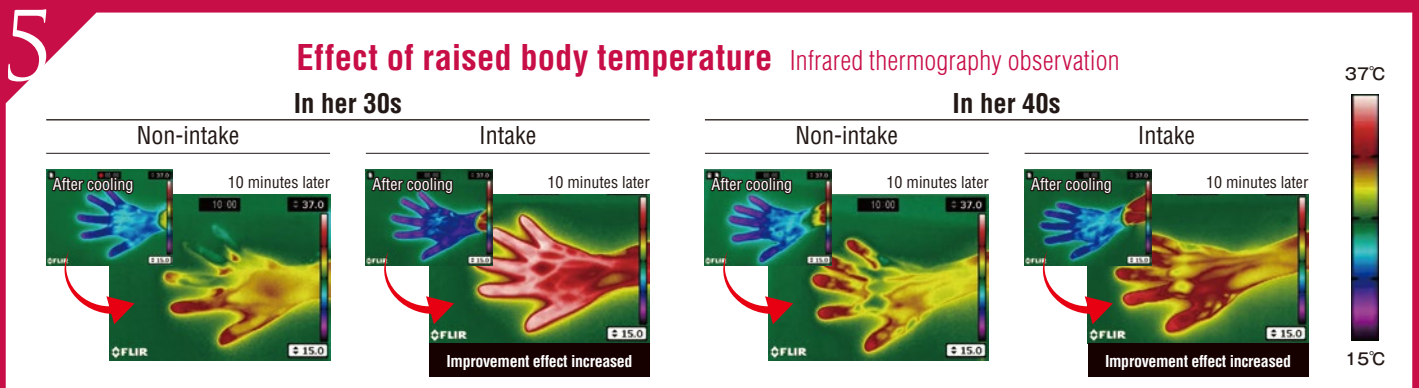

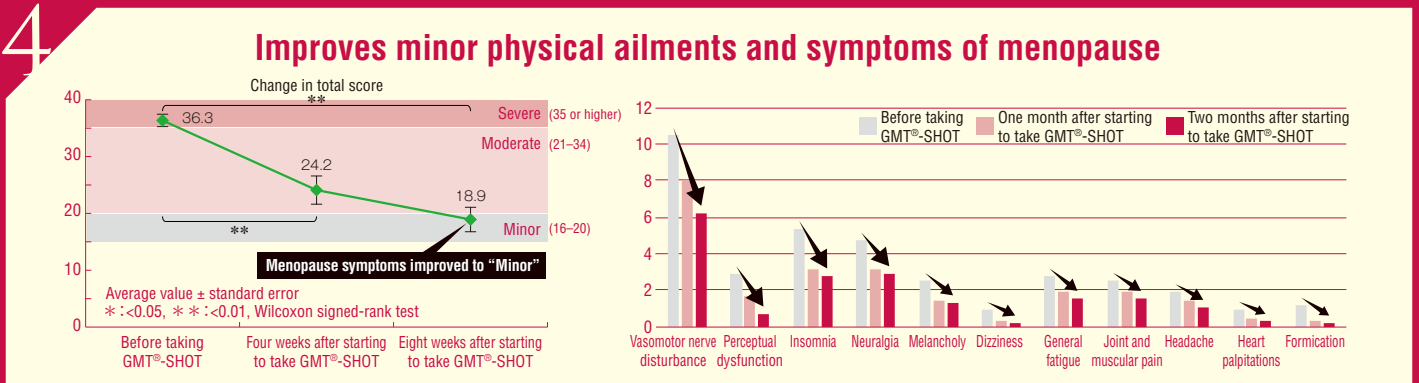

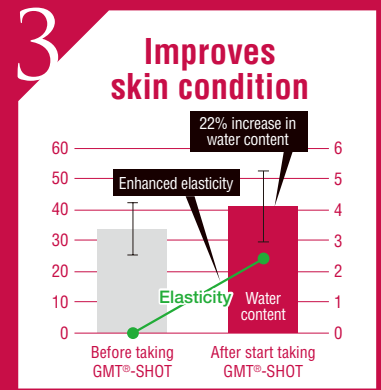

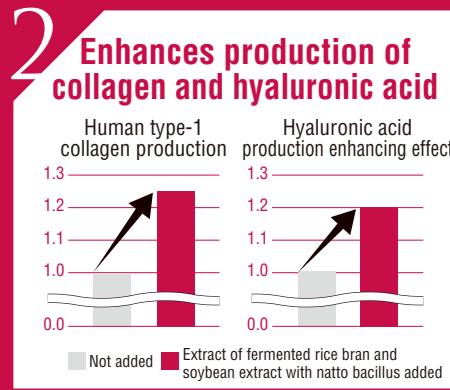

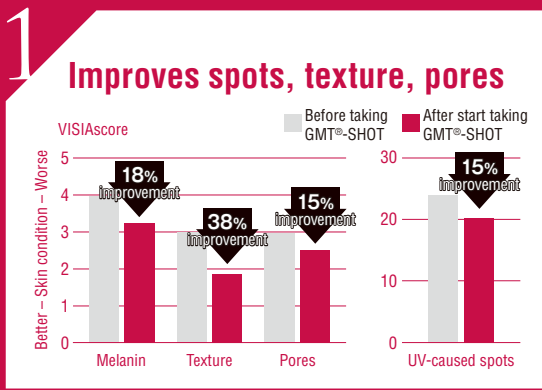

Just one shot a day—easy to continue

S.Y. -In her 50s

The other day I bumped into a friend whom I hadn't seen for a while. I was very happy when she told me that my skin looks nicer than before. The daily dose is just one shot, so it's easy for me to continue.
